

## Mechanical R&D Engineer for simulation and design

**Do you want to put your engineering skills to work in the one of the best unmanned aircraft systems in the world?**

### About the company

Nordic Wing is a pioneering developer of UAV solutions for the modern market. We deliver integrated solutions from hardware and software to services and training. We develop and manufacture UAVs for mapping & surveying, Defense & security, Search & rescue as well as other special segments like Agriculture, and construction.

Nordic Wing is expanding rapidly right now, and you will be part of an open and flexible work environment. We appreciate innovative thinking, teamwork, and participation, all the way from idea generation to implementation. You will be working with 25+ engaged colleagues who are pushing hard to make Nordic Wing the most innovative UAV company in the world. Nordic Wing has successfully put the Astero-system on the market, but the journey doesn't stop here, and we need your help going forward.

### About the job

Nordic Wing is looking for a talented Mechanical R&D Engineer that can be part of our team developing light weight structures. Your job will focus on developing the next generation of high-end fixed wing drones through design, simulation, prototyping, and testing. We are moving in a fast-changing technological landscape, and we need capable and curious minds with new ideas and technical skills!

Your tasks will cover a wide range of engineering skills, such as CAD modelling, material selection, finite element simulation, testing and validation, etc. You should not be afraid of researching, testing new technologies and taking your ideas flying.

### About you

The perfect candidate would display the following:

- M.Sc. in Mechanical or Aerospace engineering
- Good working knowledge of FEA, preferably Optistruct and/or Radioss
- Experience with light weight design
- Experienced in working with CAD software
- Good understanding of composites and manufacturing methods
- Fluent English skills, spoken and written

### What we offer

Nordic Wing is founded on many years of experience within the field, and our ambitions are high. The company has an informal and flexible work environment, where good solutions and focused work is paramount. We work hard but we also have a lot of fun. The organization is flat, giving the opportunity for good ideas to be heard. Joining the company will give you a unique opportunity to make your mark on a brand-new series of products and shape the future of UAV development.

### Practical

The position is full-time.

You will be working north of Copenhagen at the old military airport: Flyvestation Værløse.  
Deadline for application is the 1<sup>st</sup> of August and interviews will be held continuously.

**Contact**

Are you interested? Please send an application including a CV and one or two descriptions of work projects that you have been involved in.

Applications should be sent to: [jobs@nordic-wing.com](mailto:jobs@nordic-wing.com). Applications can be in Danish or English. Questions are welcome, please contact Rasmus Bruun Pedersen on (+45) 2927 3744
